Bridging the Gap between Science and Industry

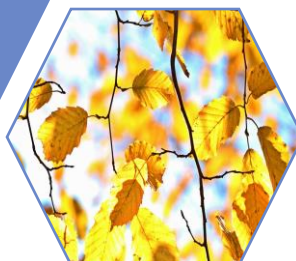

ABOUT WRS2024

The World Remanufacturing Summits are a series of annual conferences founded in 2012 and hosted in rotation among USA, Europe and Asia. This year, following the last edition in Rochester (New York, USA), the summit is held in Milan for the first time ever in Italy.

The **objectives** of the World Remanufacturing Summit are:

- to bridge the gap between the scientific and industrial communities in remanufacturing;
- to discuss innovative technologies, systems and business models for circular economy;
- to increase awareness on the benefits of remanufacturing;
- to share the view on global remanufacturing best practices.

During the event, parallel technical sessions will explore the key topics of remanufacturing and high-level plenary sessions will discuss the strategic role of remanufacturing towards the large-scale transition to a circular economy.

IN NUMBERS

- 2** DIFFERENT LOCATIONS
- 9** PARALLEL TECHNICAL SESSIONS
- 25** TOP INDUSTRIAL SPEAKERS
- 250** PARTICIPANTS
