

DA.RE.
DATA SCIENCE PATHWAYS
TO RE-IMAGINE EDUCATION

“ Are you aware of the strategic value that corporate data has for your business? ”

NO?!

DON'T WORRY,
DATA SCIENTISTS
KNOW IT

LOCCIONI

VSL

“DATA SCIENTIST,
THE SEXIEST JOB OF
THE 21ST CENTURY”

A new key
figure moves
around the
world of
business: the
data

scientist, a high-level professional with the training and the curiosity of making discoveries in the world of **Big Data**.

Their sudden appearance on the corporate scene responds to the fact that companies are beginning to struggle with varieties and volumes of information never met before.

If your organization stores **different amounts of data**, if the most important information for your business is hidden between rows and columns of numbers, if you need to do a lot of efforts into data analytics, you really need someone capable of managing and **transforming your corporate data in eureka moments for your business**.

who is this 'someone'?

The Data Scientist.

You just have to find him, engage him in your business and let him transform your business data into business opportunities.

It might seem easy, but if we consider that there are not so many university programs that offer the degree in Data Science, we understand that it is not so easy.

Da.Re. project intends to bridge the gap between the actual needs of enterprises and the training offers from HEIs, in order to enhance the functioning of the “knowledge triangle”.

The result is the design of a **training program dedicated to Data Scientists**, built on the basis of the actual needs of enterprises, so as to ensure the formation of big data professionals ready to immediately enter the world of work with the right skills .

*education-research-innovation

A Data Scientist finds out new things while swimming in the *mare magnum* of data. At ease in the digital realm, he is able to imagine a shape from large amounts of data and make it possible to be analyzed.

During this trip full of discoveries, Data Scientist **helps decision-makers** deal with

conversations about **commercial and strategic directions** for products, processes, and decisions.

What are the skills of a Data Scientist? Think of him or her as a hybrid: hacker, analyst, communicator and consultant. The combination is extremely powerful and rare.

DISCOVER OUR PILOT COURSE, YOU COULD

BECOME A DATA SCIENTIST

FIND A DATA SCIENTIST FOR YOUR COMPANY OR TRAIN ONE OF YOUR EMPLOYEES

are you a student?

are you an entrepreneur?

Big Data

“THE COMPLEX DATA FLOW, STRUCTURED AND NON, PROVIDED BY SOCIAL MEDIA, INTERNET OF THINGS, TRANSACTIONS, SENSORS, MACHINE-TO-MACHINE INTERACTION, RFID TAG.”
