

## Ricerca Project Manager senior – MES implementation

### About the Role:

As the Project Manager for MES Implementation projects, you will play a pivotal role in driving the successful adoption of Manufacturing Execution Systems (MES) for our a & Beverage manufacturing company across the World.

Leveraging your expertise in project management, technology, and Industry 4.0 principles, you will spearhead the planning, execution, and monitoring of MES implementation projects, ensuring seamless integration and alignment with our overall business objectives.

Location: Gallarate/Vicenza.

### Responsibilities:

- Develop and execute comprehensive MES implementation program plans, encompassing project scope, timelines, resource allocation, risk management, and communication strategies.
- Provide strategic leadership and direction to project teams, fostering collaboration and ensuring alignment across all aspects of the implementation process.
- Manage and oversee project execution, monitoring progress, identifying and mitigating risks, and implementing corrective actions as needed.
- Establish and maintain effective communication channels with stakeholders at all levels, keeping them informed of project progress, challenges, and key decisions.
- Oversee comprehensive testing and validation of
- MES implementations, ensuring system
- functionality, data integrity, and compliance with the Company and Client's standards.
- Document and analyze project data, extracting valuable insights for continuous improvement and optimization of future MES implementations.
- Promote a culture of continuous learning within the organization, ensuring that team members are equipped with the latest knowledge and skills in MES technologies and Industry 4.0 best practices.

### Qualifications:

- Project Management Professional (PMP®) certification or equivalent project management experience.
- Bachelor's degree in Engineering, Computer Science, Business Administration, or a related field.
- 10+ years of experience in managing complex IT and/or manufacturing projects.
- Proven track record of successfully delivering projects on time, within budget, and to the required quality standards.
- In-depth understanding of MES technologies, Industry 4.0 principles, and their application in the Food & Beverage industry.

- Exceptional communication and interpersonal skills, with the ability to build rapport, influence, and motivate diverse teams and multicultural teams.
- Strong analytical and problem-solving abilities, with a knack for identifying and resolving issues proactively.
- Proficiency in project management tools and methodologies.

Benefits:

- Smart Working with hybrid solution
- Competitive salary
- Opportunity to work with cutting-edge Industry 4.0
- cloud solutions
- Dynamic, International and collaborative work environment
- Chance to make a real impact on our clients' businesses
- Professional development and growth opportunities

Success Factors:

- Strategic thinking and vision: Ability to translate business objectives into actionable project plans and align MES implementation with overall organizational goals.
- Leadership and collaboration: Effectively manage and motivate multi-cultural teams, fostering a culture of collaboration and shared accountability.
- Technical expertise: Possess a deep understanding of MES technologies, Industry 4.0 principles, and their application in the Food & Beverage industry.
- Communication and stakeholder management:
  - Effectively communicate project progress, challenges, and decisions to stakeholders at all levels, building trust and rapport.
- Problem-solving and risk management: Anticipate and proactively address potential issues, implementing effective risk mitigation strategies.
- Change management: Champion organizational change and adoption of new technologies, fostering a culture of continuous improvement.
