

Key Speaker: *Marcus Witt*

Short CV: Marcus Witt is currently

- CTO of METROM Mechatronische Maschinen GmbH founded in 2001 with 20 employees active in the field of developing and delivering patented 5-strut parallel kinematic machines and
- CEO of 1A Technologies founded in 2020 for industrialisation of patented screw extrusion additive manufacturing (FGF) and CAM-software

Main topics:

- Identifying market needs and generating process chains on the basis of additive and subtractive technologies
- building up network relations with partner companies and universities for new technological combinations
- realisation from first idea until final acceptance on the basis of parallel kinematic machines
