

Key Speaker: *Jeffrey (Jeff) Stukenborg*

Short CV: Jeff is currently the Head of Reman Engineering at ZF Group with an office in Auburn Hills, Michigan, USA. Jeff is also the Immediate Past Chair of the Remanufacturing Industries Council headquartered in Rochester, NY. He has spent over 40 years in automotive and heavy-duty industries in many manufacturing engineering, product engineering and project management positions. He is very passionate about the reman industry since he got involved with the industry over 20 years ago while working for Delphi, WABCO, and ZF Group

Main research and industrial topics: Jeff's reman engineering organization is championing design for remanufacturing efforts at ZF, as well as, developing salvage techniques to increase material re-use in its remanufacturing processes.
