

Key Speaker: *Francesco Marzullo*

Short CV: Francesco Marzullo is a Strategic Development and Innovation Specialist at ERION, contributing his expertise to the EU Projects Team with a focus on circularity and recycling initiatives. Holding a Bachelor's and Master's degree in Materials Engineering and Nanotechnology from Politecnico di Milano, he dedicated his academic studies and research on circularity of materials in Waste from Electrical and Electronic Equipment (WEEE).

Main research and industrial topics: Francesco is involved in various European-funded projects that drive technology and process innovations in the WEEE sector. Specifically, Francesco is involved in research projects on plastic circularity, CRMs recycling and digitalization of WEEE treatment. Francesco is part of the CIRC-UIITS project, that focuses on reuse and refurbishment of semiconductors.
