

## AIMS

The Extracellular Vesicles Italian (EVIta) Society has been just founded.

EVIta promotes basic, clinical and translational research and the activation of an interactive network among Italian researchers in the field of Extracellular Vesicles.

EVIta aims to be a point of reference for the exchange of ideas, information and initiatives in this area. In order to achieve this objective and increase interest in this area, EVIta is organizing its first scientific congress in Palermo. We are sure that this opportunity will help create new partnerships and provide opportunities for exchanging ideas among researchers and possible industry partners.

The first EVIta symposium will bring together Italian excellence in the study of extracellular vesicles in a wide diversity of fields: medicine, biochemistry, physics, veterinary medicine, pharmacology.

Common areas of focus are:

- Biomarkers
- Cellular Biology
- Drug discovery
- Drug Delivery
- Epigenetics
- Cancer
- Neuroscience
- Immunology
- Liquid Biopsy
- Regenerative Medicine

## Information and registration

### Symposium Location

Real Teatro Santa Cecilia  
Piazza Teatro Santa Cecilia, 5  
90133 - Palermo

### Online registration available

[www.evitasociety.org](http://www.evitasociety.org)
