

Key Speaker: *Carolynn BERNIER*

Short CV: Carolynn Bernier is a computer engineer, graduated from the University of Toronto, and researcher at CEA, one of France's largest public research institute with a mission of innovation for industry. She has more than 20 years of experience in integrated circuit design for IoT and wireless communications.

Main research and industrial topics: Current research activities include smart embedded systems, digital technologies for the circular economy and the design of sustainable electronic systems. She is leading the CIRPASS consortium, an EU funded collaborative initiative for a standards-based Digital Product Passport for the circular economy. She, along with the CIRPASS consortium, believes that the Digital Product Passport is the future information system of the Circular Economy.
