

Key Speaker: Prof. Nabil Nasr

Short CV: Prof. Nabil Nasr is an internationally recognized leader in the effort to build a regenerative, sustainable industrial economy through research and education. Systems thinking, technological possibility, and interdisciplinarity are cornerstones of Nabil's work. As an expert advisor and delegate to a variety of forward-looking organizations, Nabil is an authoritative voice on the Title of sustainability research and technology in attaining a more prosperous economy. Over the course of two decades, Nabil's efforts as a leader and an educator have led to a series of unique research centers, initiatives, and educational programs at RIT that are dedicated solely to the advancement of sustainable industrial systems. Today, RIT's Golisano Institute for Sustainability (GIS) is a testament to those efforts.
