

Key Speaker: Livia Nastasi

Short CV: Livia Nastasi is a third year PhD student in Civil and Environmental Engineering at Department of Environment, Land and Infrastructure Engineering at Politecnico di Torino (Italy). She graduated in Environmental engineering in October 2021 with the thesis “Analysis of the application of Circular Economy principles in the sector of the commercial vehicles” carried out at CNH Industrial.

Main research and industrial topics: Her research project is entitled “Circularity assessment of a company in the sector of industrial vehicles, agricultural and construction equipment” and it is performed in partnership with the company CNH Industrial. Specifically, her work is focused on the circularity analysis of the off-road vehicles’ spare parts (electronic control units, after treatment systems and lithium-ion batteries) remanufacturing processes.
