Does your clinical work and research study refers to the classification of patient data and clinical activity in Family Medicine? Share it as an oral or poster presentation!

Are you working on a project that could help filling in the needs and gaps of the classification tools in primary care that are currently available? Pitch your ideas during an Ignite session!

Would you like to develop a training program for the International Classification of Primary Care (ICPC) or other classification tools? Organize a Workshop!

Do you have any burning questions on the use of classifications in daily practice? Submit them for discussion in Special sessions!

“Stronger together: charting the course to navigate the future” is the core theme of the 5th Forum of the Vasco da Gama Movement, the European Network for New and Future Family Doctors. This event is going to take place in Porto (Portugal) on January 26th and 27th 2018, and it calls out for the need for teambuilding and teamwork on the different topics, namely “Classification of Family Medicine consultations”.

So let's work together and ensure Family Medicine classifies for a bright future.
